

WORLD'S FIRST AND ONLY MUSCLE GENE ACTIVATOR!

- GENETICALLY TRIGGERS RAPID AND DRAMATIC MUSCLE GROWTH
- SCIENTIFICALLY ENGINEERED TO IMMEDIATELY MANIPULATE MASTER GENETIC REGULATORS $p70^{S6K}$, MAFbx, FOXO, PKB, AND mTOR
- THE MOST POWERFUL GENE-ACTIVATING MUSCLE SIZE AND STRENGTH PRODUCT EVER DEVELOPED!

MUSCLETECH ANATOR p70

WORLD'S FIRST MUSCLE GENE ACTIVATOR
 IMMEDIATELY TRIGGERS RAPID AND DRAMATIC MUSCLE GROWTH BY IMMEDIATELY ACTIVATING MUSCLE GENE EXPRESSION SCIENTIFICALLY ENGINEERED TO BLOCK SIGNALS INHIBITING AT THE GENE LEVEL
 INCREASE NUMBER OF WORKING MUSCLE CELLS FOR PROFOUNDLY INCREASED SIZE & STRENGTH
 GENETIC CHANGES ARE STAMPED ON THE PROTEIN
IT'S ONLY ANATOR THAT PUNCHES!
 100% PURE
 100% GUARANTEED

Turning Research into Reality!

Building on research completed at the prestigious University of Nottingham, Team MuscleTech™ invested more than five years into developing Anator-p70's advanced formula. Team MuscleTech relentlessly explored cutting-edge research in order to identify the key genetic triggers of muscle growth. After identifying PKB, mTOR and $p70^{S6K}$ as the master genetic regulators responsible for muscle growth, and FOXO and MAFbx as the genetic regulators that limit muscle growth, Anator-p70's one-of-a-kind formula was born.

MUSCLE GROWTH

Your DNA is the brains of each muscle cell. Depending on the enzyme signal your DNA is sent, you can either build or break down muscle. ANATOR-p70 activates the key signalling cascade mTOR, PKB, and $p70^{S6K}$, which ultimately leads to faster muscle growth you just can't get with any other bodybuilding supplement.

The diagram illustrates the process of protein synthesis within a muscle cell. It shows a cross-section of a muscle fiber with a central nucleus containing DNA and mRNA. Labels include: Muscle, NUCLEUS, CYTOPLASM, Ribosome, mRNA, and Polypeptide. Text boxes explain: "mRNA is transported into cytoplasm via nuclear pore" and "Proteins are assembled on the ribosome using a copy of the DNA blueprint (mRNA)/instructions".

Anator-p70 is designed to target and instantly activate gene regulators that increase muscle size. Not only that, but it is also engineered to turn off the gene regulators that signal muscle breakdown! Anator-p70's key ingredients are scientifically designed to stimulate these master genetic regulators – it is truly unrivalled in its formulation and in the incredible muscle building results it gives.

"Every serving of Anator-p70 delivers a powerful anabolic dose of gene-activating compounds."
